Subject: For your review: parts of the formaldehyde assessment - Hazard identification
Attachments: FormaldehydeAppendixdraft041813.docx; FormaldehydeTRdraft041913_for DB review.docx

Dear David,

Attached for your review are a portion of the hazard id section and the supporting materials in the appendices.

These include:

The introduction, and hazard syntheses for sensory irritation, pulmonary function, neurological effects, and reproductive and developmental toxicity.

The weight of evidence descriptions for each of the above health areas.

The second file titled "Formaldehyde Appendix Draft 041813", contains the following supporting information for the hazard identification.

The figures depicting the literature review results for each of the above health areas.

The study evaluation tables for each of the above health areas.

This file also contains the current version of the Response to Comments document.

The relevant responses are on pages D34 – 37, D42-48.

There are some comments to ourselves included in the document and you may want to hide these if they distract you. Also, while most of the references are linked to HERO, this is still a work in progress.

Please let me know if there is anything else you need that could help you with your review.

Regards, Barbara
